

CURRICULUM ENGINE

A revolutionary, intelligent curriculum editing & design platform

Dynamic Curriculum for a Dynamic World

Changing standards? Teacher turnover? Diverse student needs? Tight budget?

Let the Curriculum Engine work for you!

Share best practices instruction, empower your PLCs, and collaborate around your own curriculum.

✓ MEETS ESSA FUNDING GUIDELINES

Mathematics leaders' commonly asked questions

The Curriculum Engine comes with complete, aligned courses for high school math, so it's immediately ready to use. You can edit, rearrange, and add resources on the fly.

How can we empower all teachers, regardless of experience and teaching style?

✓ **DESIGNED FOR ALL TEACHERS**

With varied research-based instructional models and multiple examples, the Curriculum Engine provides instructional materials that are accessible for all teachers, regardless of experience and teaching styles.

How can we address all students' needs with our current budget?

✓ **UNLIMITED COURSE CREATION**

Using our database of thousands of curated learning objects, you can easily author, design, and deliver math curriculum for core instruction, supplemental instruction, credit and content recovery, or test preparation.

How can we organize OERs and other math resources so district leaders and teachers can easily access and employ them with confidence?

✓ **SUSTAINABILITY**

On-demand tailoring and course creation so you can meet teachers' and students' current needs, today and tomorrow.

The Curriculum Engine platform works with leading learning management systems and student information systems, or it can be used on a stand-alone basis.

Intelligent, Automated Curriculum Development
